DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-12, drawn to an apparatus for limiting the arc of rotation of an axially elongated rod about its longitudinal axis, classified in class 74, subclass 504.
 - II. Claim 13-24, drawn to an axially elongated steering shaft rotatable about its longitudinal axis, classified in class 74, subclass 492.
 - III. Claim 25, drawn to a method for limiting the arc of rotation of an axially elongated rod about its longitudinal axis, classified in class 74, subclass 492.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims 13-24 show that particulars of the subcombination (e.g. the first and second pivot arms being juxtaposed

Art Unit: 3682

to the stop assembly) are not required for patentability. The subcombination has separate utility such as for use in a device with a rotating rod.

3. Inventions I, II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown:

(1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process can be used to limit the rotation of any axially elongated rod rotating on its longitudinal axis.

4. Because these inventions are distinct for the reasons given above and the search required for each group is unique, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Kyle Rost on October 31, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin Krause whose telephone number is 571-272-3012. The examiner can normally be reached on Monday - Friday, 7:30-5:30.
